Mr. Dong-Hee Lee is an advisor at Shin & Kim, mainly practicing in the areas of Construction Disputes.

With the development of society and the economy, the contract structure and terms of various construction projects are also undergoing diversification, sophistication and evolution. In the process, claims related to construction projects have become 'unexceptional and typical events' instead of 'occasional and random events', and an important core work and a 'deciding factor of business profits and losses depending on the results'.

Mr. Lee (Professional Engineer licensed in Korea and the U.S.) provides the best service and professional expertise necessary to resolve all claims encountered in the course of the construction project in a prompt and efficient manner, based on his three-decade experience in managing various EPCO (Engineering, Procurement, Construction, Operation) projects.
